About me

I'm Ammar, a full stack developer who codes not because I have to, but because I genuinely love it. I started teaching myself before school ever came into the picture and haven't stopped since. I've also run my own agency for a while, helping multiple clients turn ideas into real websites. Whether it's a weekend, an evening, or just a spare hour, you'll probably find me building something.

Skills

Frontend

HTML5 - CSS - JavaScript - React - Tailwind

Backend

Node.js - MongoDB - JWT - Express.js

Tools

Git - GitHub - VS Code - Postman - Figma

Currently learning

Docker - Linux

Projects

Workout Manager

Full stack MERN workout application with authentication, built for managing and tracking workout routines through a modern and responsive interface.

Mafia Game

Multiplayer Mafia web game with peer-to-peer rooms, role assignment, voting, timers, and real-time game-state synchronization through an interactive browser interface.

Student Planner

React student planner for organizing tasks, tracking study progress, and managing subjects through a clean protected dashboard.
